CRYPTO MARKETS · LAUNCHPAD · CXD

CEXAID

A markets terminal and a KYC-verified private-sale launchpad where investor money never sits in the contract.

Pitch deck · October 2026 · www.cexaid.com

Not an offer. CXD has not launched.

THE PROBLEM

Early-stage crypto fundraising is opaque and risky

Opaque rounds

Investors rarely see how a round is run, where the money goes, or what happens if it fails.

Contracts as targets

Sale contracts that hold balances for weeks become a single point of failure for everyone in them.

Hidden supply events

Unlocks move prices, but schedules are scattered across project documents.

Closed doors

Listings and introductions to funds depend on relationships new projects do not have.

Not an offer. CXD has not launched.

THE SOLUTION

One platform for data, fundraising and growth

Markets terminal

All coins, trending, new pairs and a token unlock calendar across the whole market, refreshed every few minutes.

Launchpad

Founders are reviewed, investors are KYC-approved, and each round runs on its own smart contract on BNB Chain.

Services

Exchange listing support, introductions to funds and growth help for projects.

Data attracts the audience, the audience supports the launchpad, and the launchpad brings projects into services.

Not an offer. CXD has not launched.

LAUNCHPAD

How a private sale works

1

Round created

Admin deploys a dedicated contract from a factory. Window, ticket limits and hard cap are fixed.

2

Investor approved

KYC first. Each contribution needs a one-time voucher bound to the wallet and amount.

3

Contribute in USDT

The contract checks every rule, then sends the USDT to the treasury in the same transaction.

4

On-chain record

The platform records the contribution from the transaction receipt. The chain is the source of truth.

Contract balance during the sale: 0 USDT.

Not an offer. CXD has not launched.

SAFETY DESIGN

Refunds without holding funds in the contract

During the sale

Funds go straight to the treasury wallet. A hacked or faulty sale contract has nothing to steal.

The treasury address is fixed per round and cannot be changed afterwards.

If a round is refunded

1. CEXAID sends the full amount back to the round contract.
2. The contract refuses to open refunds until it holds the full amount.
3. Each investor claims their own contribution, once.
4. After the claim window (30 to 365 days) leftovers return to the treasury.

Honest limit: the contract guarantees a refund once opened. It cannot force CEXAID to send the money back, so we recommend a multisig treasury and an independent audit.

Not an offer. CXD has not launched.

THE TOKEN

CXD: planned utility

Allocation tiers

Higher tiers in launchpad rounds. KYC and approval still apply to everyone.

Fee discounts

Reduced platform fees for holders.

Staking

Stake CXD to unlock tiers and platform benefits.

Governance

Under review. No governance rights are promised.

CXD gives no ownership of CEXAID, no revenue share and no promise of profit. Chain to be announced.

Not an offer. CXD has not launched.

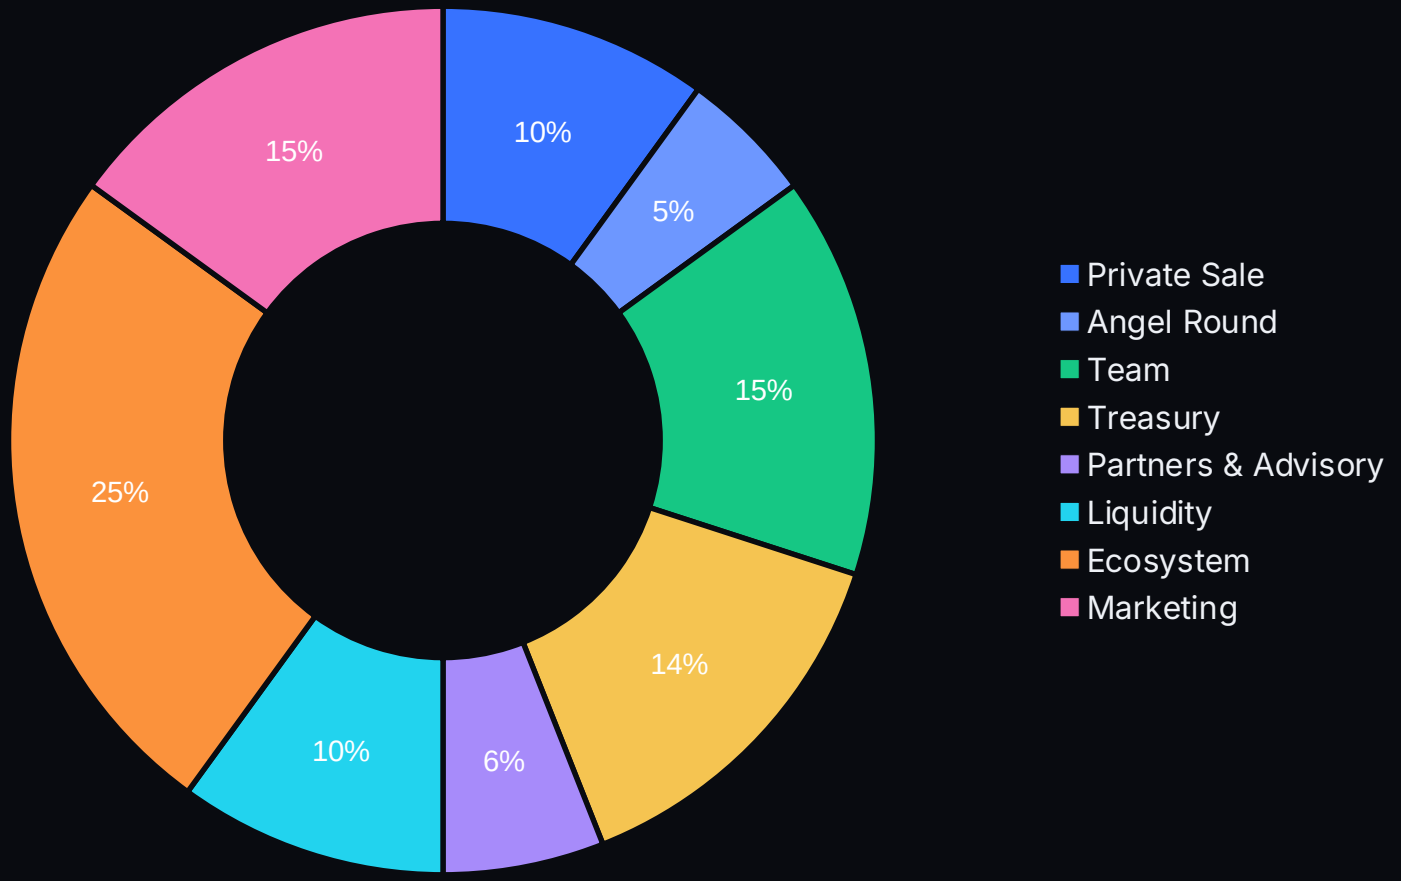

CXD

Tokenomics: fixed supply, no airdrop, no public sale

450,000,000
Total supply

9%
Circulating at launch

0
Public sale / airdrop

Allocation and vesting

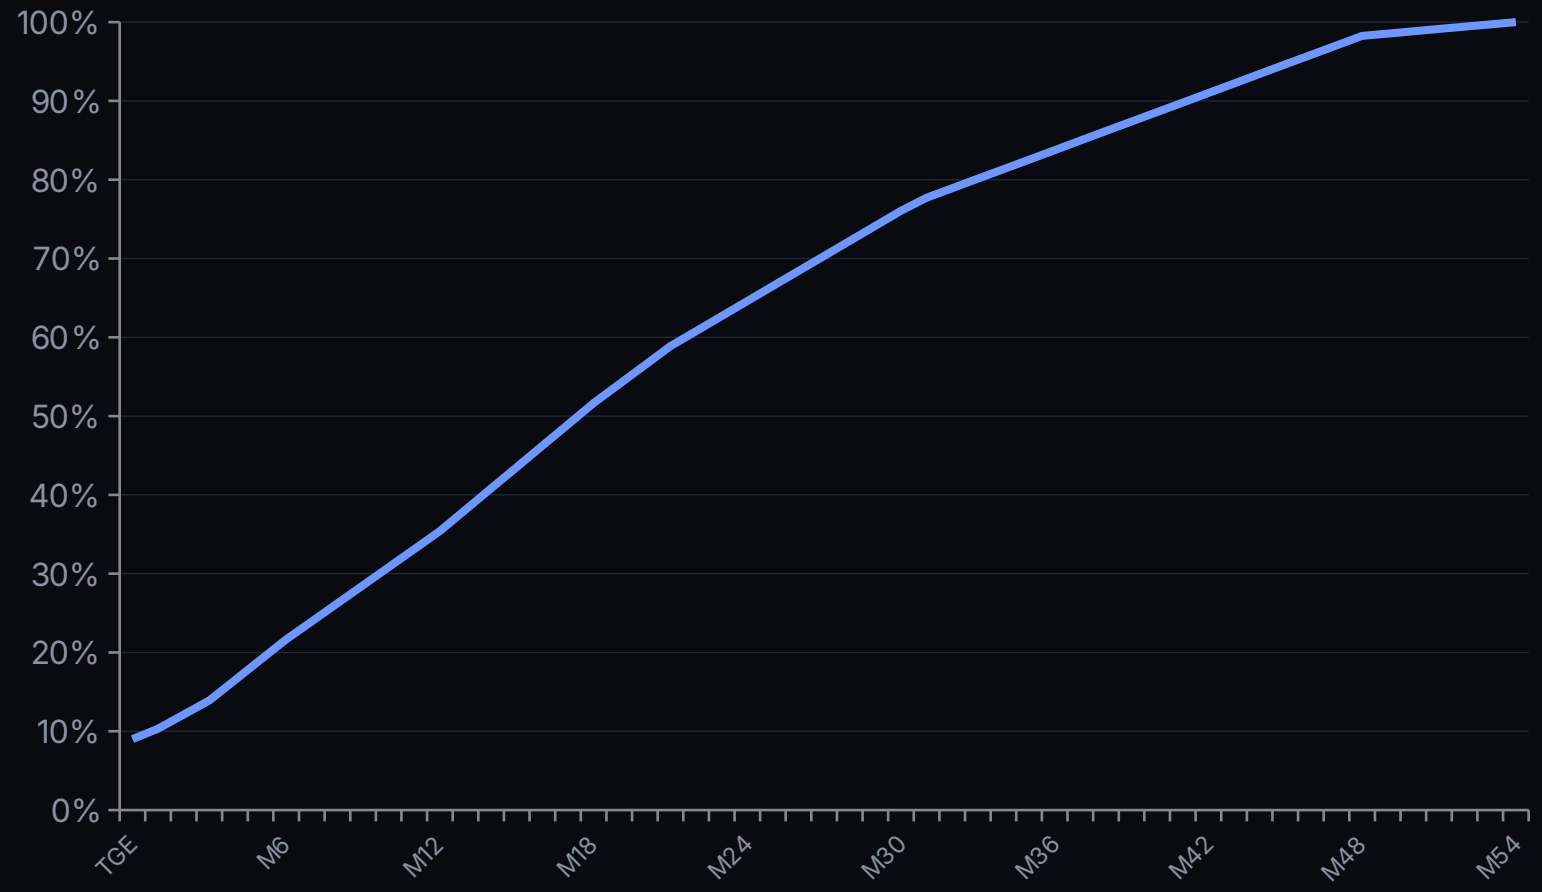

Category	Share	Tokens	Vesting
Private Sale	10%	45,000,000	10% at launch, 3-month cliff, then 18-month linear
Angel Round	5%	22,500,000	10% at launch, 3-month cliff, then 15-month linear
Team	15%	67,500,000	0% at launch, 12-month cliff, then 36-month linear
Treasury	14%	63,000,000	0% at launch, 6-month cliff, then 48-month linear
Partners & Advisory	6%	27,000,000	0% at launch, 6-month cliff, then 24-month linear
Liquidity	10%	45,000,000	50% at launch, then 6-month linear
Ecosystem	25%	112,500,000	4% at launch, then 48-month linear
Marketing	15%	67,500,000	10% at launch, 1-month cliff, then 30-month linear

Launch unlocks add up to exactly 9% of supply. Team: nothing for 12 months, then 36 months linear.

Not an offer. CXD has not launched.

CXD

Projected circulating supply

At launch	9%
Month 12	35.4%
Month 24	64.6%
Month 36	83.8%
Month 48	98.3%

Illustrative, from the vesting schedules. Excludes burns and buybacks.

Not an offer. CXD has not launched.

PLAN

Roadmap

Phase 1 · Live

Foundation

Launchpad, per-round contracts with refunds, markets, unlock calendar

Phase 2 · In progress

Design and legal

Tokenomics and whitepaper published; legal review

Phase 3 · Planned

Testnet and audit

Token and vesting contracts on testnet; independent audit

Phase 4 · Planned

Token launch

TGE after audit and legal review; liquidity and listings

Phase 5 · Planned

Utility rollout

Staking, tiers, fee discounts, ecosystem growth

Each phase is gated on audit and legal review. Dates are announced when confirmed.

Not an offer. CXD has not launched.

TRANSPARENCY

Risks we state up front

Token not launched

CXD does not exist yet. The plan may change, be delayed or be cancelled.

Contract and treasury

Sale contracts are tested but not yet independently audited. During a sale, funds sit in CEXAID's treasury wallet.

Regulation

Rules differ by country. CXD or features may be unavailable in some places.

Market

Prices are volatile and unlocks can create selling pressure.

Project risk

Listed projects can fail or delay. CEXAID reviews but does not guarantee them.

Data

Market data comes from third-party APIs and can be late or wrong.

Not an offer. CXD has not launched.
